**Legal Disclaimer**

The product described in this documentation may be connected to, and/or communicate information and data via, a network interface, which should be connected to a secure network. It is your sole responsibility to ensure a secure connection to the network and to establish and maintain appropriate measures (such as but not limited to the installation of firewalls, application of authentication measures, encryption of data, installation of antivirus programs, etc.) to protect the product, the network, your systems, and the interface against any kind of security breach, unauthorised access, interference, intrusion, leakage, damage, or corruption or theft of data. We are not liable for damages or losses related to any such security breach, unauthorised access, interference, intrusion, leakage, damage, or corruption or theft of data.

# CCLAS EL 3.0 Release Notes

---

## 3.0.0 (January 2021)

### User Interface

A MessageDLL for Russian is added to CCLAS, and a fix was applied to ensure the correct alternative language displayed on the login screen, for example, where the Ini file has the language set to 2 (English in the CCLAS EL database) and the MessageDLL set to CCMESSES.dll, and the CCLAS Language setting is set to 3 (Chinese), then the login screen now displays Chinese and not Spanish upon launching CCLAS.

### Menu Configuration

CCLAS 3.0.0 is an update to CCLAS 2.42 (and can be applied to the earlier CCLAS 2.40 as well), to essentially provide the CCLAS 3 menu application, a new version of the CCLAS Menu application. The menu serves as a starting point to launch CCLAS applications, allowing for quick access to frequently used applications.

When the CCLAS 3 menu is launched, if a CCLAS 3 menu file does not exist as yet, one is built from the existing CCLAS 2.42 (or CCLAS 2.40) menu file. This means that, initially, your CCLAS 3 menu will still link to CCLAS 2.42 (or CCLAS 2.40) .ico icon files for the applications launched from your menu.

The **CCLASInstall\_300.zip** package contains an ICON folder with CCLAS application icons that you can use in your CCLAS 3 menu, and also contains other icons that you can use for custom nodes in your CCLAS 3 menu, or in custom scripts. These icons are provided as .png graphics files - the CCLAS 3 menu can use either .ico or .png icons files. It is up to each laboratory or user to decide whether or not to update the links to each icon used in the CCLAS 3 menu.

# CCLAS EL Support

---

Datamine Software provides global support for CCLAS EL.

If you are a licensed CCLAS EL user, please use the following details to contact customer support.
